

Vulture Maze

Which of these two birds can reach the bones?

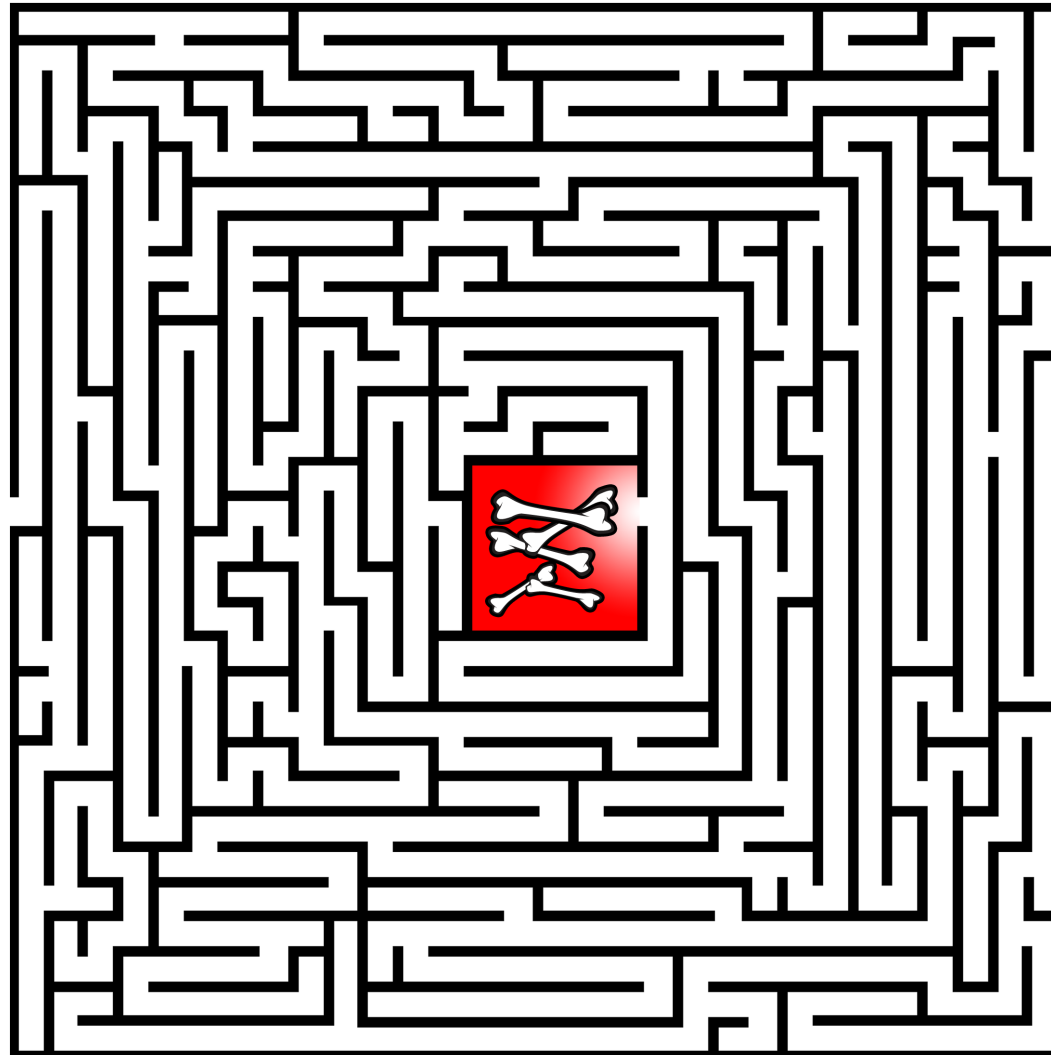

Vulture Fact #1:

Most vultures are scavengers that dine primarily on carrion. A favorite food of the Lammergeier is bone marrow. They fly up with intact bones and drop them on the ground to break open to get to the yummy bone marrow.

start?

The **Lammergeier** is also known as the **Bearded Vulture**. It likes to eat bone marrow.

Vulture Fact #2:

Certain vulture species are known to have favorite foods or food-finding strategies. Egyptian Vultures, for instance, may eat Ostrich eggs, which they break open by dropping stones on the eggs.

The **Palm-nut Vulture** will hang upside-down to eat the husk off of the fruit of a palm tree.
